Analysis of Complex Networks: From Biology to Linguistics From Wiley-Blackwell

Mathematical problems such as graph theory problems are of increasing importance for the analysis of modelling data in biomedical research such as in systems biology, neuronal network modelling etc. This book follows a new approach of including graph theory from a mathematical perspective with specific applications of graph theory in biomedical and computational sciences. The book is written by renowned experts in the field and offers valuable background information for a wide audience.

Editorial Review

About the Author

Matthias Dehmer studied mathematics at the University of Siegen (Germany) and received his Ph.D. in computer science from the Technical University of Darmstadt (Germany). Currently, he is with the Vienna University of Technology (Austria) in the department of Discrete Mathematics and Geometry. His research interests are Graph Theory, Information Theory, Computational Biology and Machine Learning.

Frank Emmert-Streib studied Physics at the University of Siegen (Germany) and received his Ph.D. in Theoretical Physics from the University of Bremen (Germany). He was postdoctoral research associate at the Stowers Institute for Medical Research (Kansas City, USA) in the Department for Bioinformatics and is currently senior research fellow at the University of Washington (Seattle, USA) in Biostatistics and Genome Sciences. His research interests are in the field of Computational Biology, Biostatistics, Machine Learning and Information Theory and Statistical Learning.

Users Review

From reader reviews:

Theodore May:

What do you concerning book? It is not important with you? Or just adding material if you want something to explain what your own problem? How about your free time? Or are you busy individual? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Every person has many questions above. They have to answer that question since just their can do which. It said that about e-book. Book is familiar on every person. Yes, it is right. Because start from on guardería until university need this kind of Analysis of Complex Networks: From Biology to Linguistics to read.

Alma Bulger:

Playing with family in a very park, coming to see the water world or hanging out with good friends is thing that usually you may have done when you have spare time, subsequently why you don't try point that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Analysis of Complex Networks: From Biology to Linguistics, you could enjoy both. It is very good combination right, you still would like to miss it? What kind of hang type is it? Oh come on its mind hangout guys. What? Still don't get it, oh come on its named reading friends.

Robert Younger:

Do you really one of the book lovers? If so, do you ever feeling doubt if you are in the book store? Aim to pick one book that you never know the inside because don't determine book by its handle may doesn't work

this is difficult job because you are afraid that the inside maybe not as fantastic as in the outside look likes. Maybe your answer could be *Analysis of Complex Networks: From Biology to Linguistics* why because the great cover that make you consider with regards to the content will not disappoint anyone. The inside or content is usually fantastic as the outside or maybe cover. Your reading sixth sense will directly assist you to pick up this book.

Daniel England:

Reading a guide make you to get more knowledge from it. You can take knowledge and information from the book. Book is prepared or printed or highlighted from each source in which filled update of news. In this modern era like right now, many ways to get information are available for you actually. From media social including newspaper, magazines, science e-book, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just searching for the *Analysis of Complex Networks: From Biology to Linguistics* when you desired it?
