Image Guided Radiation Therapy By Arno J. Mundt, John C. Roeske

Intensity modulated radiation therapy (IMRT) is a true revolution in the field of radiation oncology. IMRT provides the unprecedented means of conforming doses to the shape of the target tissues in 3-dimensions reducing the risk of complications thereby improving the quality of life of irradiated patients.

Moreover, IMRT provides the means to deliver higher than conventional doses thus improving the chance of cure in these patients. Despite its established benefits, several barriers exist to the widespread clinical implementation of IMRT. In the past, great concerns existed regarding the large capital outlay needed for both software and hardware. This barrier is less relevant today given the increased reimbursements possible with IMRT. Today, the most significant barrier is education. IMRT is a fundamentally new approach to both treatment planning and delivery. Adoption of the IMRT approach entails new ways of thinking in regard to patient selection, treatment planning and quality assurance measures. Unfortunately, apart from a few University-based short courses, limited resources are available for the physician and physicist interested in learning IMRT. Moreover, the available courses primarily focus on the physics of IMRT, not on clinical aspects of IMRT planning and delivery.

Editorial Review

About the Author

Dr. Arno J. Mundt MD is an internationally recognized radiation oncologist in the treatment of gynecologic malignancies. He is Chairman of Radiation Oncology at the Moores UCSD Cancer Center. His research focuses on the application of the new technology intensity modulated radiation therapy (IMRT) in these patients. An accomplished researcher, Dr. Mundt has authored and co-authored more than 50 scientific articles, predominantly focusing on gynecologic oncology and IMRT. John C. Roeske, PhD Professor of Nuclear Medicine, Loyola University Stritch School of Medicine, Maywood IL

Users Review

From reader reviews:

Sara Burns:

Reading a reserve tends to be new life style with this era globalization. With looking at you can get a lot of information that can give you benefit in your life. Using book everyone in this world may share their idea. Textbooks can also inspire a lot of people. Plenty of author can inspire their particular reader with their story or perhaps their experience. Not only situation that share in the publications. But also they write about the ability about something that you need example. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book that exist now. The authors on this planet always try to improve their expertise in writing, they also doing some investigation before they write to their book. One of them is this Image Guided Radiation Therapy.

Winford Patterson:

Why? Because this Image Guided Radiation Therapy is an unordinary book that the inside of the e-book waiting for you to snap this but latter it will jolt you with the secret it inside. Reading this book beside it was fantastic author who all write the book in such remarkable way makes the content interior easier to understand, entertaining way but still convey the meaning totally. So , it is good for you because of not hesitating having this any more or you going to regret it. This excellent book will give you a lot of gains than the other book have such as help improving your expertise and your critical thinking means. So , still want to postpone having that book? If I were being you I will go to the reserve store hurriedly.

Virginia Doak:

Many people spending their time period by playing outside with friends, fun activity with family or just watching TV all day long. You can have new activity to invest your whole day by studying a book. Ugh, do you consider reading a book will surely hard because you have to take the book everywhere? It okay you can have the e-book, bringing everywhere you want in your Cell phone. Like Image Guided Radiation Therapy which is having the e-book version. So , why not try out this book? Let's find.

Susan Douglas:

Do you like reading a guide? Confuse to looking for your selected book? Or your book has been rare? Why so many concern for the book? But just about any people feel that they enjoy to get reading. Some people likes studying, not only science book but also novel and Image Guided Radiation Therapy or even others sources were given knowledge for you. After you know how the fantastic a book, you feel wish to read more and more. Science reserve was created for teacher or maybe students especially. Those books are helping them to include their knowledge. In some other case, beside science reserve, any other book likes Image Guided Radiation Therapy to make your spare time far more colorful. Many types of book like here.
