Nathan Rozentals

Nathan Rozentals has been writing commercial software for over 24 years. Starting with mainframe COBOL, then moving on to C, followed by C++ and Java, and finally settling on C# and ASP.NET. He has been working with and writing blogs about the TypeScript language, since its release towards the end of 2012. Nathan currently works in the Health Industry, bringing touch-screen interfaces to medical systems; thereby enabling Bring Your Own Device (BYOD) solutions for clinicians and hospital staff. He is passionate about code quality, unit testing, and Continuous Integration (CI) and has helped many large teams implement CI, across many different software projects, in many different languages.
