The Molecular Vision of Life: Caltech, the Rockefeller Foundation, and the Rise of the New Biology (Monographs on the History and Philosophy of Biology) By Lily E. Kay

This fascinating study examines the rise of American molecular biology to disciplinary dominance, focusing on the period between 1930 and the elucidation of DNA structure in the mid 1950s. Research undertaken during this period, with its focus on genetic structure and function, endowed scientists with then unprecedented power over life. By viewing the new biology as both a scientific and cultural enterprise, Lily E. Kay shows that the growth of molecular biology was a result of systematic efforts by key scientists and their sponsors to direct the development of biological research toward a shared vision of science and society. She analyzes the motivations and mechanisms empowering this vision by focusing on two key institutions: Caltech and its sponsor, the Rockefeller Foundation. Her study explores a number of vital, sometimes controversial topics, among them the role of private power centers in shaping scientific agenda, and the political dimensions of "pure" research. It also advances a sobering argument: the cognitive and social groundwork for genetic engineering and human genome projects was laid by the American architects of molecular biology during these early decades of the project. This book will be of interest to molecular biologists, historians, sociologists, and the general reader alike.

Editorial Review

Review

"[Kay's] description of the establishment of this biology and her analysis of its implications represent an important contribution to our understanding of the social role of science in the late twentieth century." --*The Historian*

"As a contribution to the history of the American involvement in molecular biology, Kay's book is a work of considerable value, and it is written with clarity and intelligence." --*Science*

From the Back Cover

The organizational history of Caltech is the loom on which Kay has woven an intricate fabric of the molecular vision of life.

About the Author

Lily E. Kay received a Ph.D. in the history of science from the Johns Hopkins University in 1987, and was a recipient of a Smithsonian Fellowship at the National Museum of American History in Washington, D.C. in 1984. She was an Andrew W. Mellon Fellow in bibliography at the American Philosophical Society in Philadelphia, and has taught at the University of Chicago. Since 1989 she has been an assistant professor of history of science at the Massachusetts Institute of Technology.

Users Review

From reader reviews:

Ismael Black:

In this period of time globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The condition of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, classifieds, book, and soon. You will see that now, a lot of publisher which print many kinds of book. Often the book that recommended for your requirements is The Molecular Vision of Life: Caltech, the Rockefeller Foundation, and the Rise of the New Biology (Monographs on the History and Philosophy of Biology) this reserve consist a lot of the information from the condition of this world now. That book was represented so why is the world has grown up. The dialect styles that writer value to explain it is easy to understand. The actual writer made some analysis when he makes this book. That's why this book ideal all of you.

Beatrice Flanagan:

Don't be worry if you are afraid that this book can filled the space in your house, you may have it in e-book means, more simple and reachable. That The Molecular Vision of Life: Caltech, the Rockefeller Foundation, and the Rise of the New Biology (Monographs on the History and Philosophy of Biology) can give you a lot of pals because by you considering this one book you have factor that they don't and make you more like an interesting person. This book can be one of a step for you to get success. This book offer you information that possibly your friend doesn't recognize, by knowing more than additional make you to be great persons. So , why hesitate? We should have The Molecular Vision of Life: Caltech, the Rockefeller Foundation, and the Rise of the New Biology (Monographs on the History and Philosophy of Biology).

Roger Borquez:

As we know that book is very important thing to add our understanding for everything. By a guide we can know everything you want. A book is a pair of written, printed, illustrated as well as blank sheet. Every year seemed to be exactly added. This book The Molecular Vision of Life: Caltech, the Rockefeller Foundation, and the Rise of the New Biology (Monographs on the History and Philosophy of Biology) was filled with regards to science. Spend your time to add your knowledge about your scientific disciplines competence. Some people has distinct feel when they reading a book. If you know how big advantage of a book, you can sense enjoy to read a book. In the modern era like now, many ways to get book you wanted.

Charles Towns:

That book can make you to feel relax. This particular book The Molecular Vision of Life: Caltech, the Rockefeller Foundation, and the Rise of the New Biology (Monographs on the History and Philosophy of Biology) was vibrant and of course has pictures around. As we know that book The Molecular Vision of Life: Caltech, the Rockefeller Foundation, and the Rise of the New Biology (Monographs on the History and Philosophy of Biology) has many kinds or type. Start from kids until teens. For example Naruto or Private eye Conan you can read and think you are the character on there. Therefore not at all of book are make you bored, any it makes you feel happy, fun and relax. Try to choose the best book for you and try to like reading that will.
