Solar Energy at Urban Scale From Brand: Wiley-ISTE

Increasing urbanization throughout the world, the depletion of fossil fuels and concerns about global warming have transformed the city into a physical problem of prime importance. This book proposes a multi-disciplinary and systematic approach concerning specialities as different as meteorology, geography, architecture and urban engineering systems, all surrounding the essential problem of solar radiation.

It collects the points of view of 18 specialists from around the world on the interaction between solar energy and constructions, combining territorial, urban and architectural scales to better regulate energetic efficiency and light comfort for the sustainable city.

The main subjects covered are: measures and models of solar irradiance (satellite observations, territorial and urban ground measurements, sky models, satellite data and urban mock-up), radiative contribution to the urban climate (local heat balance, radiative-aerodynamics coupling, evapotranspiration, Urban Heat Island), light and heat modeling (climate-based daylight modeling, geometrical models of the city, solar radiation modeling for urban environments, thermal simulation methods and algorithms) and urban planning, with special considerations for solar potential, solar impact and daylight rights in the temperate, northern and tropical climates, and the requirement of urban solar regulation.

Contents

1. The Odyssey of Remote Sensing from Space: Half a Century of Satellites for Earth Observations, Théo Pirard.
2. Territorial and Urban Measurements, Marius Paulescu and Viorel Badescu.
3. Sky Luminance Models, Matej Kobav and Grega Bizjak.
4. Satellite Images Applied to Surface Solar Radiation Estimation, Bella Espinar and Philippe Blanc.
5. Worldwide Aspects of Solar Radiation Impact, Benoit Beckers.
6. Local Energy Balance, Pierre Kastendeuch.
7. Evapotranspiration, Marjorie Musy.
8. Multiscale Daylight Modeling for Urban Environments, John Mardaljevic and George Janes.
9. Geometrical Models of the City, Daniel G. Aliaga.

10. Radiative Simulation Methods, Pierre Beckers and Benoit Beckers.
 11. Radiation Modeling Using the Finite Element Method, Tom van Eekelen.
 12. Dense Cities in the Tropical Zone, Edward Ng.
 13. Dense Cities in Temperate Climates: Solar and Daylight Rights, Guedi Capeluto.
 14. Solar Potential and Solar Impact, Frédéric Monette and Benoit Beckers.
- Appendix 1. Table of Europe's Platforms (Micro- and Minisatellites) for Earth Observations, Théo Pirard.
- Appendix 2. Commercial Operators of Earth Observation (EO) Satellites (as of January 1, 2012), Théo Pirard.
- Appendix 3. Earth's Annual Global Mean Energy Budget, Benoit Beckers.

Editorial Review

Users Review

From reader reviews:

Michael Cardona:

Here thing why this particular Solar Energy at Urban Scale are different and trustworthy to be yours. First of all examining a book is good but it depends in the content of it which is the content is as yummy as food or not. Solar Energy at Urban Scale giving you information deeper since different ways, you can find any book out there but there is no book that similar with Solar Energy at Urban Scale. It gives you thrill reading journey, its open up your eyes about the thing this happened in the world which is perhaps can be happened around you. It is possible to bring everywhere like in playground, café, or even in your means home by train. In case you are having difficulties in bringing the imprinted book maybe the form of Solar Energy at Urban Scale in e-book can be your option.

Nancy Garcia:

Hey guys, do you wants to finds a new book to see? May be the book with the headline Solar Energy at Urban Scale suitable to you? The actual book was written by famous writer in this era. The book untitled Solar Energy at Urban Scale is one of several books that will everyone read now. This book was inspired many people in the world. When you read this publication you will enter the new shape that you ever know just before. The author explained their idea in the simple way, and so all of people can easily to comprehend the core of this e-book. This book will give you a wide range of information about this world now. To help you see the represented of the world in this particular book.

Rose Slagle:

Spent a free the perfect time to be fun activity to do! A lot of people spent their spare time with their family, or their particular friends. Usually they carrying out activity like watching television, going to beach, or picnic inside park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your free time/ holiday? Could possibly be reading a book might be option to fill your free of charge time/ holiday. The first thing you ask may be what kinds of publication that you should read. If you want to try out look for book, may be the reserve untitled Solar Energy at Urban Scale can be very good book to read. May be it might be best activity to you.

John Collins:

That book can make you to feel relax. This particular book Solar Energy at Urban Scale was multi-colored and of course has pictures on the website. As we know that book Solar Energy at Urban Scale has many kinds or type. Start from kids until teenagers. For example Naruto or Investigation company Conan you can

read and believe you are the character on there. Therefore , not at all of book are make you bored, any it makes you feel happy, fun and rest. Try to choose the best book to suit your needs and try to like reading that.
