This volume constitutes a comprehensive and accessible set of readings on the Spanish spoken in the United States. The authors examine various aspects of language structure and language use by the American Chicano, Puerto Rican and Cuban populations. Chapters include descriptions of language variation, reports of language contact and language change and analyses of the ethnography of language use in bilingual communities with particular emphasis on code-switching. Several chapters explore the educational implications of language structure and language use. This collection will be of interest to a wide range of linguists, anthropologists and sociologists. Bilingual educators and language planners in bilingual communities will find it of particular value and students of sociolinguistics will discover in it the main trends of sociolinguistic analysis usefully exemplified.
