Editorial Review

From School Library Journal

Grade 4-8-This sight-based tutorial uses a carefully paced series of basic modules and constant reinforcement to teach even mildly motivated readers how to recognize six northern hemisphere constellations, four stars, and a galaxy. Readers will also learn how to spot planets along the plane of the ecliptic, and to use stars to tell which way is north. Each page has a simplified black sky view with a brief instruction or comment—"Okay, so find the Big Dipper in this piece of sky"—in white. Readers are urged to pause at the end of each of the three sequential sections before tackling the next exercise. A hefty selection of print and Web resources, plus advice about choosing and using a telescope, provides "Next Steps." Though not specifically aimed at them, children will have no trouble using this unusual, informal approach to making sense of the night sky. The associated Web site offers, among other features, a discussion of the pedagogical method.

Review

A fascinating, clever, and delightful book. -- *Ken Lang, Tufts Professor of Astronomy and author of The Cambridge Encyclopedia of the Sun*

As entertaining as it is effective. -- *PBS, July 2003*

Don't expect an ordinary book. -- *Washington Post, July 2003*

Innovative and irresistible...this book is addictive. -- *Richard Ellis, reviewing editor of Science magazine*

No sentient person should be without these basic tools for looking up. We owe it to ourselves. -- *Neil deGrasse Tyson, Director, Hayden Planetarium, New York City*

From the Inside Flap

Stikky Night Skies has four parts:

Sequence One introduces the constellation Orion and its famous star Betelgeuse, constellations Cassiopeia and the Big Dipper, and tells you where to look for planets in the sky. It also teaches you how to find the star Polaris and use it to figure out which way is north. You should read this sequence in one sitting if possible.

Sequence Two builds on what you have learned in Sequence One, adding constellations Cygnus, Taurus and the Pleiades, stars Sirius and Vega, and the Milky Way galaxy. Ideally, you should leave a few days, but no more than a week, between completing Sequence One and reading Sequence Two.

The Epilogue, a special feature of Stikky books, brings together everything you have learned and reinforces it in some new and unfamiliar situations. Again, you should leave a few days between completing Sequence Two and reading the Epilogue.

If, by the end of the book, you are hungry to find out more, as we hope you will be, you will find dozens of things to explore in the Next Steps section.

Users Review

From reader reviews:

Willie Hickox:

Hey guys, do you would like to finds a new book to see? May be the book with the concept Stikky Night Skies: Learn 6 constellations, 4 stars, a planet, a galaxy, and how to navigate at night--in one hour, guar (Stikky series) suitable to you?
