The Science of Learning By Joseph J. Pear

For over a century and a quarter, the science of learning has expanded at an increasing rate and has achieved the status of a mature science. It has developed powerful methodologies and applications. The rise of this science has been so swift that other learning texts often overlook the fact that, like other mature sciences, the science of learning has developed a large body of knowledge. *The Science of Learning* comprehensively covers this knowledge in a readable and highly systematic manner. Methodology and application are discussed when relevant; however, these aspects are better appreciated after the reader has a firm grasp of the scientific knowledge of learning processes. Accordingly, the book begins with the most fundamental and well-established principles of the science and builds on the preceding material toward greater complexity. The connections of the material with other sciences, especially its sister science, biology, are referenced throughout. Through these frequent references to biology and evolution, the book keeps in the forefront the recognition that the principles of learning apply to all animals. Thus, in the final section the book brings together all learning principles studied in research settings by demonstrating their relevance to both animals and humans in their natural settings. For animals this is the untamed environment of their niches; for humans it is any social environment, for *Homo sapiens* is the social and learning animal par excellence.

Editorial Review

About the Author

Joseph J. Pear received his B.S. from the University of Maryland and M.A. and Ph.D. from The Ohio State University. He is currently a professor of psychology at the University of Manitoba. A fellow of Division 6 (Behavioral Neuroscience and Comparative Psychology) and Division 25 (Behavior Analysis) of the American Psychological Association, Pear does both basic and applied behavioral research. For his applied research, he developed the Computer-Aided Personal System of Instruction (CAPSI), an instructional program based on the Keller Plan. CAPSI is an award winning web-based program that is used to teach courses at the University of Manitoba and other universities in Canada and the United States. It is also a research tool that he and his graduate and undergraduate students use to study the teaching and learning dimensions of university education and institutional staff training. For his basic research, he developed a video-training system that he and his graduate and undergraduate students have used to study pigeon operant behavior and currently use to study fish operant behavior. In addition to *The Science of Learning*, Pear has written two other books, also published by Taylor & Francis: *Behavior Modification: What It Is and How to Do It* with Garry Martin, now in its 10th edition, and *A Historical and Contemporary Look at Psychological Systems*. Pear has also written numerous research articles, book chapters, and encyclopedia articles.

Users Review

From reader reviews:

Jeremy Scott:

Here thing why that The Science of Learning are different and reliable to be yours. First of all studying a book is good nonetheless it depends in the content of the usb ports which is the content is as yummy as food or not. The Science of Learning giving you information deeper and different ways, you can find any reserve out there but there is no e-book that similar with The Science of Learning. It gives you thrill looking at journey, its open up your eyes about the thing which happened in the world which is might be can be happened around you. You can actually bring everywhere like in park your car, café, or even in your way home by train. Should you be having difficulties in bringing the imprinted book maybe the form of The Science of Learning in e-book can be your option.

Nathaniel Thomas:

The actual book The Science of Learning has a lot associated with on it. So when you read this book you can get a lot of benefit. The book was compiled by the very famous author. Tom makes some research prior to write this book. This book very easy to read you can obtain the point easily after perusing this book.

Joseph Mitchell:

Your reading sixth sense will not betray you, why because this The Science of Learning guide written by

well-known writer who knows well how to make book that can be understand by anyone who else read the book. Written inside good manner for you, dripping every ideas and writing skill only for eliminate your hunger then you still doubt The Science of Learning as good book not just by the cover but also with the content. This is one guide that can break don't evaluate book by its include, so do you still needing one more sixth sense to pick this!? Oh come on your looking at sixth sense already alerted you so why you have to listening to an additional sixth sense.

Chelsie Salls:

Many people spending their time by playing outside together with friends, fun activity along with family or just watching TV all day long. You can have new activity to enjoy your whole day by studying a book. Ugh, you think reading a book will surely hard because you have to bring the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Mobile phone. Like The Science of Learning which is obtaining the e-book version. So , why not try out this book? Let's observe.
