Editorial Review

Review

From the reviews:

"This is a fascinating book in lots of ways . . . The illustrations are its primary strength and they are a very special collection. . . . Its real strength is proctology. . . . There are a number of short chapters devoted to unusual subjects: malacoplakia, pneumotosis coli, pectinosis, proctalgia fugax and coccydynia. Well illustrated and clinically written, these are valuable entries." (R. J. Baigrie, *The British Journal of Surgery*, Vol. 91 (1), 2004)

"This accurate and elegant book is the first translation into English of the fourth German edition. . . . This book will provide both students and expert proctologists with a tool for consultation. Surgeons, gastroenterologists and dermatologists will find the book extremely helpful. A useful volume for rapid consultation during routine practice for the diagnosis of anorectal and colon disease." (E. Morandi, *Digestive and Liver Disease*, Issue 35, 2003)

"This book is mainly focused on medical diagnosis of anorectal problems, with a special interest in dermatologic disorders. . . . The remarkable quality and diversity of the illustrations . . . as the pertinence of the text, make this book really enjoyable to use. This book could be of real help for the surgeon with a particular interest in proctology, who is inevitably confronted with rare lesions or conditions. A highly recommended book!" (J. Van De Stadt, *Acta Chirurgica Belgica*, Vol. 103 (3), 2003)

"For the first time the textbook and colour atlas of proctology is now available in English . . . Each of the chapters is easily readable, comprehensive in its content and the presentation is complemented by the numerous coloured figures. . . . Particularly useful is the subject index. . . . Clearly written, excellently illustrated and with up-to-date references the textbook and atlas is well produced and would be ideal for informing a wide variety of physicians, dermatologists, internists, surgeons and gynaecologists." (F. Hetzer, *Swiss Surgery*, Issue 6, 2003)
