Editorial Review

Review

3 Star Doody's Review!

Breastfeeding Handbook for Physicians is a **valuable contribution in a subject area that is overlooked during medical education** and the book meets the authors' objectives of providing a much-needed clinical resource.

Audience

Although designed for physicians, the book can be used by other health professionals, including midwives, nurses, nurse practitioners, dietitians, and lactation specialists. A rich cadre of medical experts contributed to this evidence-based and up-to-date book.

Assessment

This is a necessary resource for physicians who are interested in or have little training in the provision of human milk and breastfeeding.

About the Author

The American Academy of Pediatrics is an organization of 66,000 primary care pediatricians, pediatric medical subspecialists and pediatric surgical specialists dedicated to the health, safety and well-being of infants, children, adolescents and young adults. The AAP is the largest pediatric publisher in the world, with a diverse list of resources that includes essential clinical and practice management titles and award-winning books for parents.
