Gardner's Chemical Synonyms and Trade Names From Brand: Wiley

Through ten previous editions, Gardner's Chemical Synonyms and Trade Names has become one of the best known and most widely used sources of information on chemicals in commerce. This edition includes the results of the continuing research underlying this reference work and has seen a major expansion of the information provided for individual chemical compounds. The reference contains some 35,000 entries, many of which are new to this edition.

Gardner's features a comprehensive selection of chemicals. The main criterion for inclusion in Gardner's is a material's importance as a commercially available chemical. Thus all bulk inorganic chemicals, major pesticides, dyestuffs, surfactants, metals and alloys are included. The 5,000 highest volume chemicals in the US, as defined by application of the Toxic Substances Control Act, are all represented.

Almost all records describing pure chemicals now carry the appropriate CAS Registry Number and the associated EINECS number. In addition, the Merck Index Number is provided for all chemicals which also appear in the Twelfth Edition of the Merck Index.

Entries, wherever possible, contain detailed information on chemical composition, functions, applications and suppliers. A feature new to this edition is the inclusion of physical property data for pure chemicals. Data that has been provided, as available, includes the melting point, boiling point, density or specific gravity, refractive index, optical rotation, ultraviolet absorption, solubility and acute toxicity.

Thousands of new synonyms have been included in Gardner's to make it one of the most comprehensive sources of chemical synonym information available. Overall, both the structure of Gardner's and the quality of the information it contains have been greatly improved in this edition. The result is a reference tool that no chemical professional should be without.

Editorial Review

From the Back Cover

Through ten previous editions, *Gardner's Chemical Synonyms and Trade Names* has become one of the best known and most widely used sources of information on chemicals in commerce. This edition includes the results of the continuing research underlying this reference work and has seen a major expansion of the information provided for individual chemical compounds. The reference contains some 35,000 entries, many of which are new to this edition.

Gardner's features a comprehensive selection of chemicals. The main criterion for inclusion in *Gardner's* is a material's importance as a commercially available chemical. Thus all bulk inorganic chemicals, major pesticides, dyestuffs, surfactants, metals and alloys are included. The 5,000 highest volume chemicals in the US, as defined by application of the Toxic Substances Control Act, are all represented.

Almost all records describing pure chemicals now carry the appropriate CAS Registry Number and the associated EINECS number. In addition, the Merck Index Number is provided for all chemicals which also appear in the Twelfth Edition of the *Merck Index*.

Entries, wherever possible, contain detailed information on chemical composition, functions, applications and suppliers. A feature new to this edition is the inclusion of physical property data for pure chemicals. Data that has been provided, as available, includes the melting point, boiling point, density or specific gravity, refractive index, optical rotation, ultraviolet absorption, solubility and acute toxicity.

Thousands of new synonyms have been included in *Gardner's* to make it one of the most comprehensive sources of chemical synonym information available. Overall, both the structure of *Gardner's* and the quality of the information it contains have been greatly improved in this edition. The result is a reference tool that no chemical professional should be without.

About the Author

G.W.A. Milne spent 36 years as a research chemist at the National Institutes of Health in Bethesda, MD, USA. Here he worked on the use of spectroscopy for structure determination of organic compounds, and on molecular modelling in the design of drugs for the treatment of cancer and AIDS. He has been active for many years in the fields of chemical information and chemical computation, and is the Editor of the American Chemical Society's *Journal of Chemical Information and Computer Sciences*.

Users Review

From reader reviews:

Curtis Russell:

Why don't make it to become your habit? Right now, try to ready your time to do the important act, like looking for your favorite publication and reading a book. Beside you can solve your problem; you can add your knowledge by the publication entitled Gardner's Chemical Synonyms and Trade Names. Try to face the book Gardner's Chemical Synonyms and Trade Names as your buddy. It means that it can to become your friend when you really feel alone and beside that course make you smarter than ever before. Yeah, it is very

fortuned to suit your needs. The book makes you much more confidence because you can know anything by the book. So , let me make new experience in addition to knowledge with this book.

Michael Banks:
