Review

'I am a professional educator who has children with autistic spectrum disorders. *Yoga for Children with Autism Spectrum Disorders* is great because it gives a method to help children and adolescents with autistic spectrum disorders lead more typical lives. There are so few other effective solutions to address problems of heightened anxiety, poor motor coordination and strength, and weak self-regulation for children with autism spectrum disorders. Researchers have shown that yoga benefits individuals by aiding in stress reduction, reducing anxiety, increasing body awareness, strength, and flexibility, and increasing self-regulation. Yoga poses and breathing techniques could provide a useful intervention to increase the quality of life for children and adolescents with autism spectrum disorders.' --- Nancy J. Patrick, Ph.D., Licensed Psychologist and Autism Consultant, Assistant Professor, Messiah College, Harrisburg, PA, USA

Licensed Master Social Worker (LMSW), Certified Professional Kripalu Yoga Teacher, Certified Kripalu DansKinetics[copyright] Teacher, Albany, NY, USA

'I've been practicing yoga for five years with a Certified Yoga Teacher. I have a grandson with Asperger Syndrome who has been doing yoga for about a year. He does especially well with a modified Tree Pose and the modified Spinal Twist. Both poses are relaxing and keep his arms occupied. The Tree is wonderful for strengthening his muscles and helping his balance. The Spinal Twist is a very gentle twist that is good for his upper torso. These yoga poses have helped him release energy in a positive way rather than him "flapping" his arms. I believe that *Yoga for Children with Autism Spectrum Disorders* is an excellent resource for many families who need to find ways for their children cope with Asperger Syndrome. This book has allowed me to share my love of yoga with my grandson and feel like I contribute to making his life a little bit better. I am grateful to have access to this wonderful resource.' --- Judy Waldman, Former Elementary Teacher, B.S., Early Childhood and Elementary Education, Temple University, Philadelphia, PA, USA

In my 14 years of experience as a speech therapist and eight years of experience as a practicing Certified Yoga Teacher, I have found yoga to be the most effective form of therapy for children with Asperger Syndrome. As a result of using yoga with children with Asperger Syndrome, I have found that these children display increasing overall attention, and greater awareness of their environment as well as increasing overall socialization skills with other children. (Judy E. Stasek, M.S., CCC-SLP, and Certified Yoga Teacher)

The book is a guide and there is a chapter on how the guide should be used. It suggests a basic yoga sequence that may be used for a child with ASD. Empahsis is on a well rounded practice to give physical and mental benefits. The postures are divided into four sections: Warm-Ups, Strengthening, Release of Tension and Calming...The postures described are simple and need not be physically demanding and have clear step-by-step instructions. There are also some lovely photographs of Stacey, the mother, assisting and encouraging Joshua into postures. The aim is to help the child connect improve coordination and balance. The focus that comes from trying and holding postures can improve concentration as well as promote a sense of achievement and enjoyment. Attention to the breathing can promote good health and an awareness of the breath helps an awareness of the body. It can then become a tool to use at times of stress, agitation, anger or boredom. (British Journal of Occupational Therapy)
