**Calculus I (Undergraduate Texts in Mathematics)** By Jerrold Marsden, Alan Weinstein

The goal of this text is to help students learn to use calculus intelligently for solving a wide variety of mathematical and physical problems. This book is an outgrowth of our teaching of calculus at Berkeley, and the present edition incorporates many improvements based on our use of the first edition. We list below some of the key features of the book.

**Examples and Exercises** The exercise sets have been carefully constructed to be of maximum use to the students. With few exceptions we adhere to the following policies.

- The section exercises are graded into three consecutive groups: (a) The first exercises are routine, modelled almost exactly on the exam ples; these are intended to give students confidence. (b) Next come exercises that are still based directly on the examples and text but which may have variations of wording or which combine different ideas; these are intended to train students to think for themselves. (c) The last exercises in each set are difficult. These are marked with a star (\*) and some will challenge even the best students. Difficult does not necessarily mean theoretical; often a starred problem is an interesting application that requires insight into what calculus is really about.
- The exercises come in groups of two and often four similar ones.

## **Editorial Review**

### **Users Review**

#### **From reader reviews:**

##### **Jennifer Carter:**

You are able to spend your free time to see this book this guide. This Calculus I (Undergraduate Texts in Mathematics) is simple to develop you can read it in the park your car, in the beach, train in addition to soon. If you did not include much space to bring the printed book, you can buy typically the e-book. It is make you better to read it. You can save typically the book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

##### **Rene Defeo:**

Many people spending their time period by playing outside along with friends, fun activity along with family or just watching TV 24 hours a day. You can have new activity to invest your whole day by studying a book. Ugh, do you consider reading a book will surely hard because you have to accept the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Mobile phone. Like Calculus I (Undergraduate Texts in Mathematics) which is keeping the e-book version. So , try out this book? Let's find.

##### **Cheryl Fisher:**

That reserve can make you to feel relax. This kind of book Calculus I (Undergraduate Texts in Mathematics) was colorful and of course has pictures on the website. As we know that book Calculus I (Undergraduate Texts in Mathematics) has many kinds or style. Start from kids until young adults. For example Naruto or Detective Conan you can read and believe you are the character on there. So , not at all of book are generally make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading in which.

##### **Doris Avey:**

A lot of book has printed but it differs. You can get it by online on social media. You can choose the best book for you, science, witty, novel, or whatever by simply searching from it. It is known as of book Calculus I (Undergraduate Texts in Mathematics). You can include your knowledge by it. Without departing the printed book, it may add your knowledge and make anyone happier to read. It is most important that, you must aware about reserve. It can bring you from one destination to other place.
