A Practical Approach to Pharmaceutical Analysis: Instrumental and Manual:for B. Pharmacy and M. Pharmacy Students By Nema et.al

This Manual is based on the practical approach to pharmaceutical analysis following both instrumental as well as manual presentations, and is designed keeping in view the syllabi of various universities in India and other countries. Viewing all aspects, the book starts with spectrophotometric analysis and covers various aspects of flame photometry, potentiometric titrations, fluorimetry, polarimetry, conductometric titration, refractometry, nepheloturbidimetry and chromatography - thin layer chromatography, paper chromatography, high performance liquid chromatography and high performance thin layer chromatography. Special emphasis has been laid on the interpretations of infrared spectra and mass spectra, Karl Fischer titration and Kjeldahl's method. The book has been designed to serve as a ready-reckoner, both for the students as well as the teachers, with a unique feature that the students can write the observations and calculations directly without wasting their valuable time. It aims to be useful to all undergraduate as well as postgraduate students.
