### GSD Platform 6 From Actar

Harvard University Graduate School of Design has always recognized the indispensable importance and values of architecture, landscape architecture, urban planning, and urban design, yet has transcended their individual aspirations through intellectual cross-fertilization and collaboration. The material presented in this publication forms a small part of the incredible range and diversity of proposals and visions that the GSD students and faculty have produced during the past academic year. This work is indicative of the School's commitment, as a global leader in the field, to exploring and articulating transformative ideas through the power of design. It is as important for us to share and communicate the outcome of our research and design investigations as it is to show the fertile circumstances and conditions for the making of these projects.
