Multivariate Analysis with LISREL (Springer Series in Statistics) By Karl G. Jöreskog, Ulf H. Olsson, Fan Y. Wallentin

This book traces the theory and methodology of multivariate statistical analysis and shows how it can be conducted in practice using the LISREL computer program. It presents not only the typical uses of LISREL, such as confirmatory factor analysis and structural equation models, but also several other multivariate analysis topics, including regression (univariate, multivariate, censored, logistic, and probit), generalized linear models, multilevel analysis, and principal component analysis. It provides numerous examples from several disciplines and discusses and interprets the results, illustrated with sections of output from the LISREL program, in the context of the example. The book is intended for masters and PhD students and researchers in the social, behavioral, economic and many other sciences who require a basic understanding of multivariate statistical theory and methods for their analysis of multivariate data. It can also be used as a textbook on various topics of multivariate statistical analysis.

Editorial Review

From the Back Cover

This book traces the theory and methodology of multivariate statistical analysis and shows how it can be conducted in practice using the LISREL computer program. It presents not only the typical uses of LISREL, such as confirmatory factor analysis and structural equation models, but also several other multivariate analysis topics, including regression (univariate, multivariate, censored, logistic, and probit), generalized linear models, multilevel analysis, and principal component analysis. It provides numerous examples from several disciplines and discusses and interprets the results, illustrated with sections of output from the LISREL program, in the context of the example. The book is intended for masters and PhD students and researchers in the social, behavioral, economic and many other sciences who require a basic understanding of multivariate statistical theory and methods for their analysis of multivariate data. It can also be used as a textbook on various topics of multivariate statistical analysis.

About the Author

Karl G. Jöreskog is Professor Emeritus at Uppsala University, Sweden, and Senior Professor at the BI Norwegian School of Business in Oslo. He has received three honorary doctorates: from the Faculty of Economics and Statistics at the University of Padua, Italy, 1993, from the Norwegian School of Economics, Bergen, Norway, 1996, and from the Faculty of Psychology at the Friedrich-Schiller-Universität, Jena, Germany, 2004. Professor Jöreskog is a member of the Swedish Royal Academy of Sciences, a Fellow of the American Statistical Association, and an Honorary Fellow of the Royal Statistical Society. He has received many awards including the American Psychological Association Distinguished Award for the Applications of Psychology and the Psychometric Society Award for Career Achievement to Educational Measurement. Together with Dag Sörbom he developed the LISREL computer program.

Ulf H. Olsson is Professor at Department of Economics and Provost at BI Norwegian Business School in Oslo with responsibility for research and academic resources. He has worked on structural equation modeling, statistical modeling and psychometrics and published several research articles in leading statistics and psychometric journals. Dr. Olsson has also authored textbooks on statistics and mathematics. In 2003 Olsson was awarded the BI Norwegian Business School's research prize.

Fan Y. Wallentin is Professor of Statistics at Uppsala University, Sweden. She received her Ph.D. in Statistics in 1997. She is a recipient of the Arnberg Prize from the Swedish Royal Academy of Sciences. Dr. Wallentin's program of research is on the theory and applications of latent variable modeling and other types of multivariate statistical analysis, particularly their applications in the social and behavioral sciences. She has published research articles in several leading statistics and psychometrics journals. She has taught courses on Structural Equation Models in Sweden, USA, China and several European countries. She has broad experience in statistical consultation for researchers in social and behavioral sciences.

Users Review

From reader reviews:

Justin Price:

What do you concerning book? It is not important along with you? Or just adding material when you want something to explain what yours problem? How about your spare time? Or are you busy person? If you don't have spare time to complete others business, it is make one feel bored faster. And you have extra time? What did you do? Every individual has many questions above. They should answer that question simply because just their can do that will. It said that about reserve. Book is familiar on every person. Yes, it is right. Because start from on kindergarten until university need this kind of Multivariate Analysis with LISREL (Springer Series in Statistics) to read.

Andrew Nixon:

Hey guys, do you desires to finds a new book to learn? May be the book with the subject Multivariate Analysis with LISREL (Springer Series in Statistics) suitable to you? Often the book was written by well-known writer in this era. Typically the book untitled Multivariate Analysis with LISREL (Springer Series in Statistics) is a single of several books that everyone read now. This kind of book was inspired many men and women in the world. When you read this publication you will enter the new dimensions that you ever know before. The author explained their strategy in the simple way, and so all of people can easily to comprehend the core of this guide. This book will give you a lots of information about this world now. So you can see the represented of the world in this book.

Charles Stubblefield:

The reserve untitled Multivariate Analysis with LISREL (Springer Series in Statistics) is the publication that recommended to you to study. You can see the quality of the book content that will be shown to you. The language that author use to explained their ideas are easily to understand. The copy writer was did a lot of exploration when write the book, and so the information that they share to your account is absolutely accurate. You also can get the e-book of Multivariate Analysis with LISREL (Springer Series in Statistics) from the publisher to make you much more enjoy free time.

Suzanne Robbins:

Many people spending their time by playing outside together with friends, fun activity together with family or just watching TV the whole day. You can have new activity to invest your whole day by examining a book. Ugh, do you think reading a book will surely hard because you have to bring the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Smartphone. Like Multivariate Analysis with LISREL (Springer Series in Statistics) which is getting the e-book version. So , try out this book? Let's observe.
