Editorial Review

From the Back Cover

"Synchronicities are expressions of the dreamlike nature of reality. Just like with our dreams at night, our inner process is given shape through the seemingly outer world. There is an instantaneous correspondence between the inner and outer worlds, not because they are two separate dimensions that are communicating faster than the speed of light, but because they are inseparably united as one seamless, already unified, whole continuum."

-Paul Levy

"Science is about observation. Simply that. To really understand the true nature of the 'reality' that surrounds us we have to take into account subjective experiences as well as objective observations. It is only through treating anomalous experiences as sources of scientific data that we will reach a fuller appreciation of the wonders of this universe."

-Anthony Peake

"In the last decade I have grown to appreciate the piling up of these so-called coincidences as evidence of a deep structuring to reality bearing the unmistakable signature of consciousness. The process has shocked my expectations, based as they were on scientific materialism, and caused me to re-evaluate my worldview in light of the evidence. The fact that so many disparate measurements converge on a few numbers and ratios does not appear to be random. There is more to reality than the physical."

-Scott Onstott

"Carl Jung coined the term synchronicity; this is his definition: 'Synchronicity is the coming together of inner and outer events in a way that cannot be explained by cause and effect and that is meaningful to the observer.' A shorter definition would be a *meaningful coincidence*. Shorter still would be to just say *pay attention*. The shortest definition of synchronicity is *magic*."

-Mike Clelland
