Introduction to Tribology By Bharat Bhushan

Coverage of critical cutting-edge topics including MEMS, nanotribology and magnetic surface storage technologies.

- * Integrates the knowledge of tribology from mechanical engineering, mechanics, and materials science points of view.
- * Covers both the underlying theory and the current applications of tribology to industry.

Editorial Review

From the Back Cover

Complete coverage from fundamentals to cutting-edge applications

A solid understanding of tribology is essential for engineers in many fields working to design and ensure the reliability of machine parts and systems. This Introduction to Tribology presents detailed coverage of the mechanisms of friction, material wear, and all major lubrication techniques-liquids, solids, and gases-along with traditional and state-of-the-art applications, as well as the latest material coverage of micro/nanotribology, MEMS, and magnetic surface storage applications.

The underlying theory and current applications of tribology are covered in an integrated treatment taken from a mechanical engineering, mechanics, and materials science point of view. This book's straightforward presentation begins with the principles of tribology and prepares readers to understand the industrial applications of tribology. The principles of tribology and the emerging field of micro/nanotribology are then explored, and, finally, the author looks at tribological components and applications.

Complete with exercises and problems, Introduction to Tribology is invaluable to mechanical, chemical, and materials engineers in product and process design, as well as students in mechanical, chemical, and materials engineering and physics courses.

About the Author

BHARAT BHUSHAN, PhD, DSc (Hon.), is an Ohio Eminent Scholar and Howard D. Winbigler Professor at The Ohio State University in Columbus, where he also serves as Director of the Nanotribology Laboratory for Information Storage and MEMS/NEMS (NLIM).

Users Review

From reader reviews:

Wm Schroeder:

In this period globalization it is important to someone to acquire information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of personal references to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. The actual book that recommended to you personally is Introduction to Tribology this guide consist a lot of the information on the condition of this world now. This kind of book was represented just how can the world has grown up. The dialect styles that writer value to explain it is easy to understand. The particular writer made some investigation when he makes this book. That's why this book suitable all of you.

Kathryn Granger:

Is it you actually who having spare time subsequently spend it whole day by simply watching television programs or just lying down on the bed? Do you need something new? This Introduction to Tribology can be the solution, oh how comes? A fresh book you know. You are and so out of date, spending your time by

reading in this brand new era is common not a nerd activity. So what these publications have than the others?

Don Morris:

You can find this Introduction to Tribology by go to the bookstore or Mall. Merely viewing or reviewing it might to be your solve issue if you get difficulties for your knowledge. Kinds of this guide are various. Not only by written or printed but also can you enjoy this book by means of e-book. In the modern era just like now, you just looking because of your mobile phone and searching what their problem. Right now, choose your ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still update. Let's try to choose suitable ways for you.

Travis Davis:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information from a book. Book is written or printed or illustrated from each source that will filled update of news. With this modern era like at this point, many ways to get information are available for a person. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Do you want to spend your spare time to open your book? Or just in search of the Introduction to Tribology when you required it?
