Concurrent Programming in Java: Design Principles and Patterns (Java Series) By Douglas Lea, Doug Lea

This text treats Java as a software engineering language rather than a means of developing simple applets. It aims to enable programmers to find out more about how to use concurrency in the design of classes, applets and applications to create multi-threaded applications. Features of the book include integrated surveys and tutorials on concurrency and Java programming constructs, and reusable components and micro-architectures solving common software construction problems.
