### Editorial Review

#### About the Author

For **Elaine N. Marieb**, taking the student's perspective into account has always been an integral part of her teaching style. Dr. Marieb began her teaching career at Springfield College, where she taught anatomy and physiology to physical education majors. She then joined the faculty of the Biological Science Division of Holyoke Community College in 1969 after receiving her Ph.D. in zoology from the University of Massachusetts at Amherst. While teaching at Holyoke Community College, where many of her students were pursuing nursing degrees, she developed a desire to better understand the relationship between the scientific study of the human body and the clinical aspects of the nursing practice. To that end, while continuing to teach full time, Dr. Marieb pursued her nursing education, which culminated in a Master of Science degree with a clinical specialization in gerontology from the University of Massachusetts. It is this experience that has informed the development of the unique perspective and accessibility for which her publications are known.

Dr. Marieb has partnered with Benjamin Cummings for over 30 years. Her first work was *Human Anatomy & Physiology Laboratory Manual* (Cat Version), which came out in 1981. In the years since, several other lab manual versions and study guides, as well as the softcover *Essentials of Human Anatomy & Physiology* textbook, have hit the campus bookstores. This textbook, now in its 10th edition, made its appearance in 1989 and is the latest expression of her commitment to the needs of students studying human anatomy and physiology.

Dr. Marieb has given generously to colleges both near and far to provide opportunities for students to further their education. She contributes to the New Directions, New Careers Program at Holyoke Community College by funding a staffed drop-in center and by providing several full-tuition scholarships each year for women who are returning to college after a hiatus or attending college for the first time and who would be unable to continue their studies without financial support. She funds the E. N. Marieb Science Research Awards at Mount Holyoke College, which promotes research by undergraduate science majors, and has underwritten renovation and updating of one of the biology labs in Clapp Laboratory at that college. Dr. Marieb also contributes to the University of Massachusetts at Amherst where she generously provided funding for reconstruction and instrumentation of a cutting-edge cytology research laboratory. Recognizing the severe national shortage of nursing faculty, she underwrites the Nursing Scholars of the Future Grant Program at the university.

In 1994, Dr. Marieb received the Benefactor Award from the National Council for Resource Development, American Association of Community Colleges, which recognizes her ongoing sponsorship of student scholarships, faculty teaching awards, and other academic contributions to Holyoke Community College. In May 2000, the science building at Holyoke Community College was named in her honor.

Dr. Marieb is an active member of the Human Anatomy and Physiology Society (HAPS) and the American Association for the Advancement of Science (AAAS). Additionally, while actively engaged as an author, Dr. Marieb serves as a consultant for the Benjamin Cummings Interactive Physiology® CD-ROM series.

When not involved in academic pursuits, Dr. Marieb is a world traveler and has vowed to visit every country on this planet. Shorter term, she serves on the scholarship committee of the Women's Resources Center and

on the board of directors of several charitable institutions in Sarasota County. She is an enthusiastic supporter of the local arts and enjoys a competitive match of doubles tennis.

**Lori A. Smith** received her Ph.D. in Biochemistry from the University of California at Davis. Before discovering her passion for teaching, she worked as a research scientist and project leader in the medical diagnostics industry. In 1999, she joined the faculty at American River College in the Biology Department. Currently she teaches anatomy and physiology and microbiology to pre-nursing and mortuary science students at American River College. Starting in 2005, she began co-authoring Pearson's *PhysioEx: Laboratory Simulations in Physiology* and has continued to co-author several versions of the software and lab manual. She is also co-authoring Pearson's *Human Anatomy & Physiology* Lab Manual. Dr. Smith has been awarded "Instructor of the Year" by the American River College Associated Students for her commitment to serving students, and she is a member of the Human Anatomy and Physiology Society (HAPS) and the National Association of Biology Teachers (NABT).

## Users Review

### From reader reviews:

#### **Betty Adkins:**

Book is to be different per grade. Book for children until adult are different content. As it is known to us that book is very important for us. The book Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) had been making you to know about other information and of course you can take more information. It is very advantages for you. The publication Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) is not only giving you considerably more new information but also to be your friend when you experience bored. You can spend your own personal spend time to read your reserve. Try to make relationship with the book Human Anatomy Laboratory Manual with Cat Dissections (8th Edition). You never feel lose out for everything if you read some books.

#### **Timothy King:**

In this 21st centuries, people become competitive in most way. By being competitive currently, people have do something to make them survives, being in the middle of the crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated this for a while is reading. Yep, by reading a book your ability to survive enhance then having chance to stay than other is high. To suit your needs who want to start reading any book, we give you this Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) book as beginner and daily reading reserve. Why, because this book is usually more than just a book.

#### **Eleanor Walker:**

Here thing why this kind of Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) are different and trustworthy to be yours. First of all examining a book is good however it depends in the content of computer which is the content is as tasty as food or not. Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) giving you information deeper including different ways, you can find any book out there but there is no publication that similar with Human Anatomy Laboratory Manual with Cat Dissections

(8th Edition). It gives you thrill examining journey, its open up your eyes about the thing that will happen in the world which is might be can be happened around you. It is easy to bring everywhere like in area, café, or even in your means home by train. For anyone who is having difficulties in bringing the imprinted book maybe the form of Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) in e-book can be your option.

**Catherine Scott:**

Nowadays reading books become more and more than want or need but also become a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge even the information inside the book in which improve your knowledge and information. The info you get based on what kind of guide you read, if you want attract knowledge just go with education books but if you want really feel happy read one using theme for entertaining for example comic or novel. Typically the Human Anatomy Laboratory Manual with Cat Dissections (8th Edition) is kind of book which is giving the reader unforeseen experience.
