Leonardo da Vinci: Notebooks (Oxford World's Classics) By Leonardo da Vinci

Most of what we know about Leonardo da Vinci, we know because of his notebooks. Some 6,000 sheets of notes and drawings survive, perhaps one-fifth of what he actually produced. With an artist's eye and a scientist's curiosity, he recorded in these pages his observations on the movement of water and the formation of rocks, the nature of flight and optics, anatomy, architecture, sculpture, and painting. He jotted down fables, epigrams, and letters and developed his belief in the sublime unity of nature and man. Through his notebooks we can get an insight into Leonardo's thoughts, and his approach to work and life. This selection, organized in seven themed sections, offers a fascinating and informative sample of his writings. Fully updated, this new edition includes some 70 line drawings and a Preface by Martin Kemp, one of the world's leading authorities on Leonardo, who explores the artist's genius and the contents and legacy of his manuscripts. The book also features new notes and a chronology of Leonardo's life.
